1	60-2450-230	<p><b>Conmed - System 2450</b>  <b>Electrosurgical Generator</b>                      A member of ConMed's family of electrosurgical generators, provides state-of-the-art innovation in an easy-to-use format. The System 2450 is simple on the outside, yet sophisticated and powerful on the inside.</p> <p><b>Dynamic Response Technology</b> The System 2450 incorporates ConMed's Dynamic Response technology, the most advanced generator design on the market. Dynamic Response reacts to changes in tissue in less than 10 milliseconds ensuring the delivery of the desired amount of power while limiting the chances of thermal damage to surrounding tissue. Generators without Dynamic Response can produce more arcing and potentially more damage to the surrounding area.</p> <p><b>Safety:</b> Patient safety is always a priority. The System 2450 ESU features ConMed's Automatic Return Monitor (ARM) technology designed to alert the operating room staff if the patient/grounding pad contact is compromised when used with compatible dual pad dispersive electrodes. ARM helps to reduce the risk of pad site burns.</p> <p><b>Features</b> :-Dynamic Response Technology: The most advanced generator design available.                      Continuous ARM safety monitoring                      Automatic programming restores The System 2450 ti the last settings used                      One hand switch / footswitch combination jack and a separate hand switch allows for multiple accessory connections                      Bovie style foot switch connector incorporated into the</p>	6
